International Technical Translation Conference

tradulínguas

Lisbon, Portugal

28 / 29 MAY 2010

Invitation to present at the **TRADULÍNGUAS International Technical Translation Conference**

If you are a **seasoned technical translator**, with a **strong record in the translation of technical and engineering-related subjects** or an **engineer actively involved in the translation of technical materials**, the Conference attendees would like to learn from your experience.

Expected speakers

Technical translators, engineers actively involved in translation, project managers of translation companies specializing in technical translation, technical dictionary authors, stakeholders involved in the generation, management, or dissemination of knowledge in the area of technical/engineering translation are invited to submit proposals for oral presentations for practical learning sessions – translation and terminology workshops.

Expected contributions

Subjects closely related to technical, engineering and industrial translation are specially welcome. Theoretical presentations on translation studies and/or linguistics are not the subject of this Conference.

Method of presentation

Educational / practical mini-workshops (1 to 2 hours) or shorter presentations (30/45 min.) with PowerPoint® projection (presentation will be included in the Conference CD-ROM with other reference / didactic materials (PDF) selected by speaker).

Languages

Presentations and audiovisual / printed (PDF) materials must be in Portuguese (European or Brazilian), English, Spanish or French or any combination of these languages. Speakers are kindly requested to make their oral presentations in English.

Version: 17FEB2010
